What Changed (Plain-English Summary)

Aug 04 — Conversion Rate: Conversion Rate has risen to 3.60 (+9.2% vs. the 14-day average of 3.30). This looks like a positive shift, worth confirming it's expected.

Aug 05 — Cost: Cost has risen to 4,753.59 (+9.3% vs. the 14-day average of 4,350.24). This may need attention.

Aug 07 — Traffic: Traffic has risen to 18,702.00 (+102.5% vs. the 14-day average of 9,233.93). This looks like a positive shift, worth confirming it's expected.

Aug 07 — Conversion Rate: Conversion Rate has dropped to 1.84 (-44.8% vs. the 14-day average of 3.33). This may need attention.

Aug 09 — Refunds: Refunds has risen to 143.61 (+256.3% vs. the 14-day average of 40.30). This may need attention.

Aug 10 — Revenue: Revenue has dropped to 9,982.96 (-20.2% vs. the 14-day average of 12,509.89). This may need attention.

Analyst Notes

Aug 07: Traffic and conversion rate moved together — this pattern usually indicates a change in traffic quality (e.g. a campaign or referral source bringing in less qualified visitors) rather than a site issue.
